

Pandrol Quality Plan	Component: Z00.22090.11 SCREW M22 90/50 CLASS 8.8	
Approved Supplier: PANDROL IBERICA, Spain	Contract: ORASCOM	
Issue Date: September 2023	Issue Level: 00	Approved By: J Otaegi Quality and Environment Director Pandrol EMEA Fastenings
Amendment(s) from previous issue level:		
Confidential Information: Pandrol Limited Proprietary Specification		* FAT = Factory Acceptance Testing It is a requirement to supply a copy of a current calibration certificate for each piece of calibrated inspection equipment used during FAT.
FAT Acceptance Criteria: In the event a non-compliant result occurs during the FAT, the following action shall apply: If a failure occurs, further 3 components shall be selected. Inspection of the non-compliant feature shall be carried out on these 3 components. If 2 or more of these 3 components give a non-compliant result, the batch shall be rejected.		

Activity	Item	Specification	Reference Document	FAT Sample Size	Witness Inspection Activity
Raw material	Composition	Comply with the characteristics	ISO 898-1	Per batch of raw material	Raw material supplier's QC report
Manufacture	Dimensions	Complies with standard	DIN 931	3 samples from each product type	Measurement of the dimensions thread and length (bolt head not included)
	Functional	Nut to be screwed		3 samples from each product type	Visual
	Markings	Present, legible and correct.	DIN 931	3 samples from each product type	Visual
Quality certificate	Document	Comply with range of values stated in the certificate	ISO 898-1	1 certificate per batch	Review the certificate
Packaging	Finished product	Correct quantity and type. Correct packing method. Correct labels.	Pandrol packing list	Every outer package	Visual / calibrated weighing equipment
